DATASHEET

WIDEBAND VOIP FOR SUPERB CALL CLARITY

The Jabra GN2000 OC headset allows users to experience the true wideband sound of Microsoft® Office Communicator 2007 – even in noisy offices. The noise-canceling microphone enables crystal clear communication by effectively reducing unwanted background noise.

VOIP WITH SUPERB CALL CLARITY

The quality of a headset used in a real-time VoIP or video call has a significant impact on the quality of the call. The Jabra GN2000 OC headset will enhance your experience with Microsoft® Office Communicator 2007 by providing full wideband audio capability.

While other so-called “wideband” headsets cut-off around 4,000 Hz, the Jabra GN2000 OC headset provides a full frequency response up to 6,800 Hz for optimum call clarity resulting in significantly less need to ask customers to repeat themselves. The Jabra GN2000 OC headset is fully compliant with TIA-920 specifications for wideband digital sound and features PeakStop™ technology, which eliminates sudden loud noises above 118 dB SPL.

ENHANCED EXPERIENCE – EASE OF USE

The Jabra GN2000 OC for Microsoft® Office Communicator 2007 is a true plug-and-play solution. Much simpler than a handset or desk phone, the Jabra GN2000 OC headset has an in-line hook switch control to answer and end calls. In-line volume controls adjust the headset speakers to a comfortable level and to mute the headset simply press the mute button.

The Jabra GN2000 OC headset works with Microsoft® Office Communicator 2007 without requiring any additional software including drivers.

Just plug and play!

Jabra GN2000 OC Mono

Jabra GN2000 OC Duo

SAFETY

The GN2000 Series meets the electric strength test and impulse test requirements of the international standard IEC 60950-1. It also meets EN 60950, AS/NZS3260, and UL 60950 standards.

DESIGNED TO PERFORM. BUILT TO LAST

Discover the exceptional comfort of an ergonomically designed headset for professional use.

The Jabra GN2000 OC is based on technology from the Jabra GN2000 series, which has proven its worth in offices and contact centers all over the world.

Extra-thick, pivoting foam ear cushions provide exceptional comfort and automatically adjust to the shape and angle of individual ears. The large ear cushions also provide better acoustical coupling, ensuring a rich incoming signal.

Jabra headsets are made of impact-resistant materials that are strong and resilient to keep the headset firmly, yet comfortably in place throughout the workday.

SYSTEM REQUIREMENTS

The Jabra GN2000 OC headset works with Microsoft® Office Communicator 2007 without requiring any additional software including drivers. Just plug the headset into your PC USB port.

WHAT'S IN THE BOX

- Jabra GN2000 OC headset with flexible noise cancelling boom featuring duo, over-head wearing style with foam ear cushions and additional leatherette cushions as an accessory.
